

MANOHAR GUNDA

UX LEAD

✉ manohar.gunda@gmail.com

☎ +91-9980 287 908

📍 Hyderabad, India

Creative and detail-oriented UI/UX designer with 10+ years of experience in crafting visually stunning and user-centric digital experiences. Proficient in the entire design process, from user research and wireframing to prototyping and high-fidelity design. Adept at translating complex concepts into intuitive and elegant interfaces that captivate users.

- ▶ Proficient in designing web and mobile applications for both Android and iOS platforms, using industry-standard design tools such as Adobe XD, Figma, Sketch, Illustrator and Photoshop.
- ▶ Experienced in creating logos, social media banners, flyers, and brochure designs, showcasing a versatile range of design capabilities.
- ▶ Skilled in using design tools to create interactive prototypes and wireframes, allowing for iterative design improvements based on user testing and feedback.
- ▶ Designed, developed, and supported HTML5 and CSS3-based applications, with a focus on mobile device compatibility.
- ▶ Expertise in Twitter Bootstrap, including grid systems and advanced components like navigation bars, pagination, alerts, and progress bars. Proficient in implementing Bootstrap plugins for carousel, accordions, and modal windows.
- ▶ Experienced in resolving complex issues related to browser performance, ensuring compatibility across various browsers, including legacy versions of Internet Explorer.
- ▶ Proficiency in front-end technologies such as HTML5, CSS3, jQuery, Tailwind CSS, and Front End Kendo-Angular UI.
- ▶ Adept at designing responsive interfaces that adapt seamlessly to different devices and screen sizes, ensuring a consistent and user-friendly experience.
- ▶ Experience in working with Agile Development Model and Scrum Methodology
- ▶ Experience in establishing and maintaining design systems and style guides, ensuring design consistency and scalability across projects.
- ▶ Excellent communication & teamwork skills. Collaborates seamlessly with cross-functional teams, including developers & product managers, to ensure design vision aligns with development capabilities.

TECHNICAL SKILLS

Designing Skills:

Adobe Photoshop

Adobe Illustrator

Adobe XD

Adobe Indesign

Figma

Sketch

Development Skills:

HTML. HTML5

CSS, CSS3

Bootstrap 3, 4 & 5

Tailwind CSS

JQuery, Javascript

Kendo UI

RESPONSIBILITIES HANDLED

User Experience (UX) Responsibilities:

User Research: Conduct user research to understand the target audience, their needs, pain points, and behaviors. This may involve surveys, interviews, usability testing, and competitor analysis.

Information Architecture: Create a clear and logical structure for the product, including sitemaps and user flows, to ensure users can navigate it efficiently.

Wireframing: Develop wireframes or low-fidelity prototypes to outline the basic layout and functionality of the product. This helps in early-stage testing and feedback.

Prototyping: Build interactive prototypes with higher fidelity to simulate the user experience and gather feedback before the final design is implemented.

Usability Testing: Conduct usability testing sessions with real users to identify usability issues and refine the design based on user feedback.

Interaction Design: Define how users interact with the product by designing interactive elements like buttons, forms, and navigation menus.

Accessibility: Ensure the product is accessible to all users, including those with disabilities, by following accessibility guidelines (e.g., WCAG).

User Persona Creation: Create user personas to represent different user types and their goals, helping the team empathize with and design for specific user segments.

User Testing Analysis: Analyze data from user testing and analytics tools to make informed design decisions and iterate on the product.

User Interface (UI) Responsibilities:

Visual Design: Create visually appealing and cohesive designs that align with the product's brand identity and target audience preferences.

Typography: Choose appropriate fonts and typography styles for readability and aesthetics.

Color Theory: Select a color palette that conveys the desired emotions and maintains accessibility standards.

Iconography: Design icons and graphical elements that are intuitive and consistent with the overall design.

Layout Design: Arrange UI elements and content in a way that enhances usability and guides users through the interface.

Responsive Design: Ensure that the UI is adaptable to various screen sizes and devices, maintaining a consistent user experience.

UI Animation: Implement subtle animations and transitions to improve the user experience and provide feedback on interactions.

Style Guides and Design Systems: Create and maintain design guidelines and systems to ensure consistency across the product and future iterations.

Collaboration: Collaborate closely with UX designers, developers, and other stakeholders to bring the design to life and address any technical constraints.

User Interface Testing: Conduct UI testing to ensure that the design is implemented correctly and functions as intended in the final product.
